

Department of Education

It's a great start.

Children learn a lot in the early years of life and early learning programs give your child the very best start to life as they learn, grow and discover the world around them.

The Tasmanian Government provides a wide range of services for children in the early years – giving parents the chance to make the choice that is right for them and their family.

Great Start is an Early Years web portal that provides easy to access information about the early years programs offered through the Department of Education. It includes links to a range of video support resources to assist parents in supporting their child. <https://greatstart.tas.gov.au/>

Supporting children and their families in the early years can set them on a path of wellbeing and success throughout their lives.

At Hillcrest Primary School Ann-Maree Mulcaster is our LIFT co-ordinator. Families who are interested in finding out more or who would like to access this web portal are encouraged to visit Ann-Maree at school in the library on Wednesday – Friday of each week. Alternatively, for more information you can phone her on 6424 5211 or email her:
