

The Cuckoo Clock Of Doom

By R.L STINE

I think you should read the book if you like scary books because it is a Goosebumps book. It is a really good book because it starts off scary, then it isn't and then it is scary again.

You would enjoy it if you're in for a scare. It is about two little kids and their Dad who goes and buys a cuckoo clock, but the cuckoo bird is alive and it is a monster !!!

I can relate to the story because there is a 12 year old boy with a little sister who is 7 years old who is so annoying and likes to play jokes and I have a little sister who is 7 years old who likes playing jokes on me.

The main characters are Tara, Michael, Webster and their Mum and Dad, and the bird from the cuckoo clock.

The problem is that the bird is alive, but that it pretends to be fake when the parents are around.

My favourite character is Tara because she likes playing pranks on her brother.

They don't believe that the bird is alive until they see it for themselves.

So I think you should read the book to because it is a really good book.
