

Learning at school or at home, we did it together!

We were not alone!

Exploration,
Investigation,
Determination and,
of course, Fun!
Learning in Kinder at
home or at school is
always a busy time!

The Prep-1s have been very busy little learners. They have had to be extremely flexible with so many different changes, but have done such an incredible job!

At school and home, the learning has included the importance of hygiene and remembering to wash their hands regularly throughout the day.

Also included are retelling stories, correctly forming letters, skip counting, measuring objects, ordinal numbers, odd and even numbers and using the Zones of Regulation to understand their own emotions.

Over the past few weeks in 1/2N and 2/3P, students have been learning about 2D and 3D objects. During week 4, students at home and at school have been working to design and construct a 3D castle.

They created a 3D brain and also learnt how our Zones of Regulation tool kit can help our brain to make good choices and prevent the "lid from flipping".

It has been hard not being able to meet with our beautiful families for such a long time. But do not despair! We can still stay connected!

In term 2 Launching all into Learning will take an online approach to deliver stories, play, singing, music and other fun adventures. I encourage families to follow the Padlet link provided as this is where you will find the most resources and videos uploaded every Wednesday and Friday afternoons.

The Seesaw app is a good way for you and your children to share with us and also a quick way to contact me.

In the next few weeks Rachel and I will be putting together resource packs to send home to all our LIL families. These will be linked in with the songs, and activities we share digitally so you can join in at home! If you have not registered this year with LIL but have children at home aged 0-4 years, please contact the office and we can add you to the list to receive some goodies for your little ones!
