

3-4B

During Maths time, in our class, we have been learning about measurement, concentrating on length. To consolidate our understanding of millimetres, centimetres and metres, we read the book 'Actual Size' by Steve Jenkins.

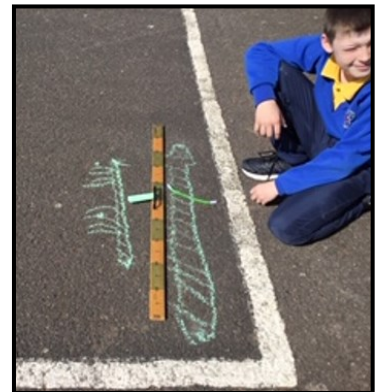

"Sometimes facts and figures don't tell the whole story. Sometimes you need to see things for yourself - at their actual size." So, by using rulers, metre rulers and trundle wheels we measured the length of the animals, marked the size and drew our own image of that animal using chalk. Here are some of them.

Did you know that an ostrich is 2.75m tall? Measured and drawn by Dieter and Amos.

Did you know that the Alaskan Brown Bear stands 4m tall? Measured and drawn by Ella and Sienna.

Brody and Lucas measured and drew the Giant Gippsland Earthworm which was 90cm long, the Giant Walking Stick which was 56cm long and the Goliath Beetle which was 15cm long.

The Africa Elephant is 4m tall. Lily and Lyra measured and drew this.

Did you know the Great White Shark is 6.5m long? Zoe and Dakota had the pleasure of measuring and drawing this.
